

OUR MISSION

Our mission is to create a new “blue ocean” of possibilities for the market, which will allow users to trade earned loyalty points (along with unifying user data) and engage those users into consuming on a whole new level with mutual benefits for all (organizations and customers).

WULET is a blockchain platform that will give its users the opportunity to use cryptocurrency in everyday life, and businesses the chance to attract new clients and keep their current clientele.

INTERNAL EXCHANGE

- All loyalty points will be tradable
- Exchange rate will be set by the levels of supply and demand
- WU-token will serve as a universal measure among loyalty points

WULET will implement its own internal exchange, where bonus points of various loyalty programs will be presented. This will allow customers to decide what bonuses they need, and companies to keep those loyalty programs that are already well-known and loved.

MOBILE APP

- Easily find the company you need with our convenient app
- Convenient wallet for all your bonus cards
- Manage, redeem and exchange your loyalty points timely

WULET is developing an ultimate tool that will help customers to get engaged in a game, where they are not pressured by intrusive advertising but receive the most precise offers at the moment of request/purchase/exchange/receiving loyalty points.

TOKENSALE PARAMETERS

Current Stage:
Private Sale
